Open Access to Scholarly Communications

Open Access Workshop Belgrade, Serbia & Montenegro 10-11 November, 2005

Overview of presentation

- Introduction to Open Access
- Open Access Journals
- Institutional Repositories
- Support of Open Access
- eIFL Open Access Program

Driving force behind open access – Dissatisfaction at all levels

- Authors: their work is not seen by all their peers – do not receive the recognition they deserve
- <u>Readers</u>: cannot view all research literature they need – less effective
- Libraries: cannot satisfy information needs of their users

Background of the BOAI

December 2001, Budapest: OSI held a meeting of leaders exploring alternative publishing models. Concluded that "open access" was the goal and agreed on two main strategies for achieving it:

- 1. open access journals
- 2. self-archiving/institutional repositories

Definition of open access

In using the term 'open access', we mean the free availability of peer-reviewed literature on the public internet, permitting any user to read, download, copy, distribute, print, search, or link to the full texts of the articles.

OSI's Open Access Project

Builds upon principles outlined in BOAI and aims to assist the international effort to make research articles in all academic fields freely available online.

Open access journals

A journal which is freely available online worldwide and does not rely upon the traditional subscription based business model to generate revenue.

Open access journals

Open access journals employ a combination of new business models, among them:

- Article processing fee
- Hybrid model
- Advertising
- Sponsorship

Publishers convert to open access

Oxford University Press – Oxford Open Program Journal of Nucleic Acids, Journal of Botany

 National Academy of Sciences
 Proceedings of the National Academy of Sciences

Springer – Open Choice

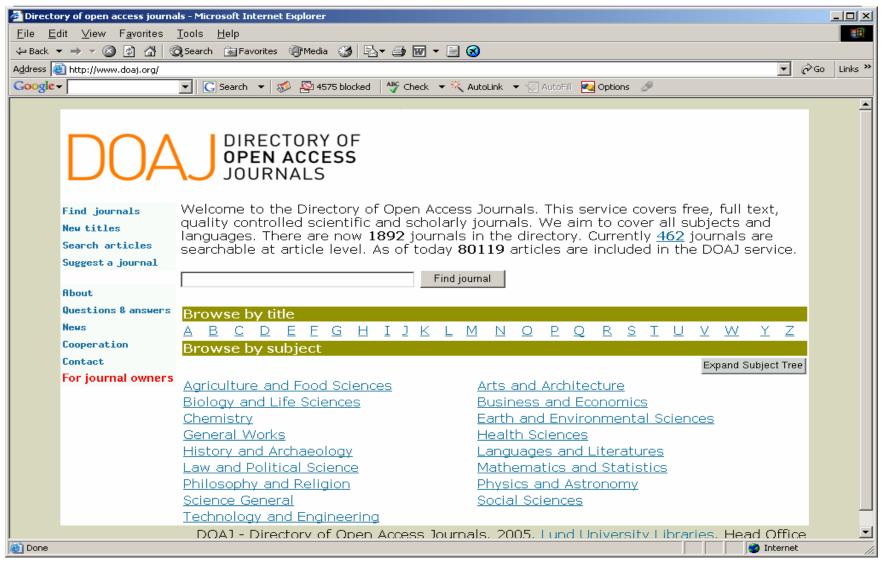

New open access journals

BMC: over 130 titles covering all areas of biology and medicine

PLoS

- PLoS Biology, PLoS Medicine
- PLoS Computational Biology, PLoS Genetics, and PLoS Pathogens

Home	Guide to Open Access Publishing and Scholarly Societies	
<u>Read the</u> initiative <u>Sign on to the</u> initiative <u>View signatures</u>	This guide has a limited scope. It is meant to help scholarly societies - and small publishers - assess the options available to them for the future of their journal publishing programmes. Though the option of keeping the status quo of subscription-based journals is discussed, the focus is on conversion of existing journals to open access, either in one go, or via an intermediate managed transition phase.

Institutional repositories

Publicly accessible repository (archive) where all the work published by researchers/authors affiliated with the university/academy can be posted online. Contributes to the status of the institution by displaying the intellectual output of the institution.

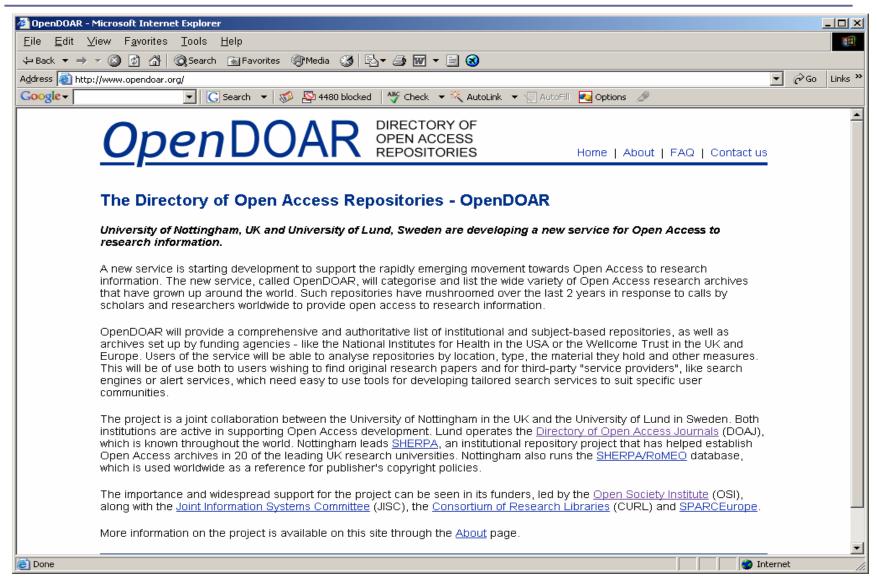

Institutional repositories

All work is deposited in the repository by using interoperable software, which allows the works in the repositories to be searched and harvested. Such software is called Open Archives Initiative (OAI) compliant. Examples of OAI compliant software are DSpace, E-Prints.

Institutional repository software

Institutional repositories

Support of Open Access

- BOAI, February 2002
- Bethesda Statement, April 2003
- Berlin Declaration, October 2003 & May 2004, February 2005
- Wellcome Trust, October 2003
- UK Parliamentary Inquiry, 2004
- US NIH Policy, 2005
- Salvador Declaration on Open Access: the Developing Country Perspective, 2005

elFL.net

- An independent foundation that strives to lead, negotiate, support and advocate for the wide availability of electronic resources by library users in transition and developing countries.
- Operates through a network of national library consortia in 55 countries.

eIFL Open Access Program

Supported by OSI

Call for Interest among eIFL members:

- Serbia, KoBSON, November 2003 & November 2005
- South Africa, SASLI, July 2004 & May 2005
- Ukraine, IRF, February 2005
- Lithuania, LMBA, February 2005
- China, LCAS, June 2005
- Slovenia, COSEC, 2006
- Russia, 2006
