2011. godina

Krajem maja i početkom juna 2011. godine biće održan **jednodnevni** edukativni seminar o korišćenju KoBSON servisa namenjen ovogodišnjim stipendistima Ministarstva nauke. Termini su:

Beograd	26. i 27. maj i 3. i 6. juni , Narodna biblioteka Srbije, Elektronska učionica, Skerlićeva 1, Beograd (od 10.00 do 17.00 h)
----------------	--

Neophodno je da svaki pozvani stipendista **potvrdi** svoje učešće e-mail-om na kobson@nb.rs (Subject: Prijava za edukaciju stipendista u 2011. god). U e-mail-u **obavezno navesti dva najprihvatljivija termina** za pohađanje seminara (zbog ograničenog broja mesta u elektronskoj učionici). Stipendisti koji se prijave biće obavješteni o konačnom rasporedu pohađanja edukacije putem e-mail-a. Poželjno je pročitati tekst za kurs, članak (PDF na srpskom 1.92 MB)

Na sajtu [PhD Comics](#) mogu se naći duhovite situacije u kojima se nalazi svaki student doktorant. Pogledajte u trenucima odmora (ako ih ima), i sigurno će Vas ohrabriti da nastavite dalje.

Postoji odličan [flajer](#) za pridruživanje i podršku Open Access-u, kao i stranica na kojoj možete pronaći [10 načina](#) za pomoć i unapređenje publikovanja u Open Access režimu.

Edukacija stipendista Ministarstva nauke

U toku 2008. godine počeo je sa radom poseban program namenjen mladim istraživačima koji je obuhvatio doktorante - stipendiste Ministarstva nauke i tehnološkog razvoja Republike Srbije. Cilj programa je da se mladi istraživači, na početku svoje naučne karijere, obuče za korišćenje svih servisa KoBSON-a, kao i da se upoznaju sa osnovnim pojmovima vezanim za naučno publikovanje i vrednovanje.

Kriza sistema naučnih komunikacija

- broj naslova časopisa je dupliran, a nabavka smanjena za 6%
- cene časopisa rastu po stopi od 9% godišnje
- biblioteke nisu u mogućnosti da pretplate sve potrebno
- veliki porast cena časopisa iz oblasti prirodnih nauka, medicine i tehnike (STM), čak 11% godišnje (prosečna cena visoko kvalitetnih časopisa oko 10000 \$)
- prosečna profitna stopa u izdavaštvu 5%, a u izdavaštvu naučnih informacija čak i do 40%

Dva (pokušaja) rešenja

- prelazak na elektronski oblik
- biblioteke koordiniraju nabavku sa srodnim bibliotekama i formiraju konzorcijume

Prednosti elektronske forme

- pristup do publikacija brži i jeftiniji
- pristup nije vezan za vreme i mesto
- moguće je korišćenje multimedijalnih sadržaja
- biblioteke mogu da pruže na korišćenje svoje resurse neograničenom broju korisnika

Šta je KoBSON?

Konzorcijom biblioteka Srbije za objedinjenu nabavku

U 2009. godini, iz akademskih institucija u Srbiji, dostupno je preko 35.000 naslova stranih naučnih časopisa u punom tekstu, oko 40.000 naslova knjiga, kao i nekoliko indeksnih baza podataka.

Pretraživanje na KoBSON portalu moguće je obaviti samo prema naslovu časopisa ili knjige. Većina časopisa je u punom tekstu je dostupna od 1997. godine, dok su ranija godišta dostupna do nivoa abstrakta.

Za predmetna pretraživanja po člancima upućujemo Vas ili na nekog od agregatora, ili direktno na sajt izdavača.

Vrednovanje

- stalna potreba vrednovanja naučne produkcije
- problem je pronalaženje načina

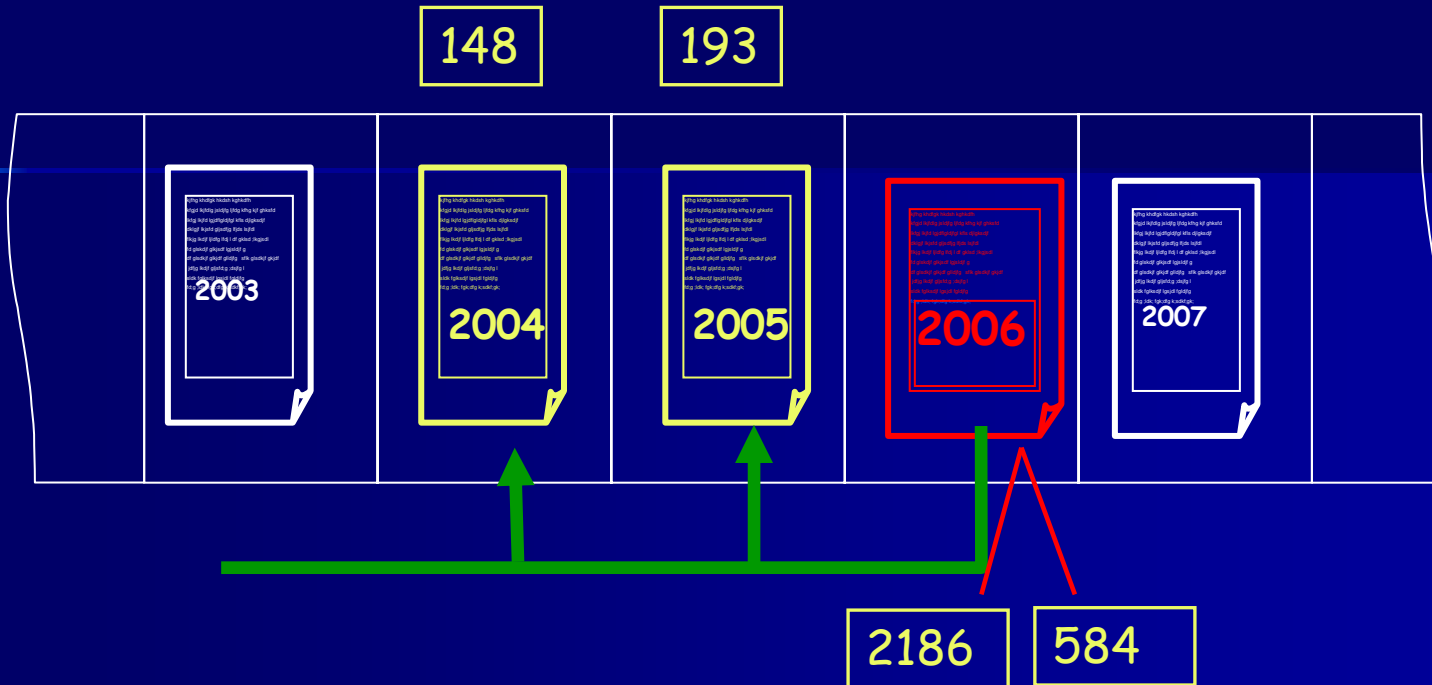

Impact Factor

Faktor uticaja časopisa je danas veoma raširen kriterijum za izbor časopisa u bibliotekama, kao i za izbor u kom časopisu objaviti rad.

Brojna vrednost faktora uticaja dobija se tako što se broj citata za dve poslednje godine podeli sa brojem objavljenih radova u te dve godine.

Faktor uticaja eliminiše razlike koje su mogle da nastanu kao posledica veće periodičnosti (više brojeva godišnje) ili dužinom izlaženja časopisa.

Impact Factor

broj citata iz 2005 i 2004, u radovima 2006

ABSTRACT

We propose two new indices that are able to measure a scientific researcher's overall influence and the level of his/her works' association with the mainstream research subjects within a scientific field. These two new measures – total influence index and the mainstream index – differ from traditional measures such as the simple citation count and the *h*-index in that they take into account the indirect influence of an author's work. Indirect influence describes a scientific work's influence upon subsequent works that do not reference it directly. The two new measures capture indirect influence information from the knowledge emanating paths embodied in the citation network of a target scientific field. We take the Hirsch index, data envelopment analysis, and lithium iron phosphate battery technology field to examine the characteristics of these two measures. The results show that the total influence index favors earlier researchers and successfully highlights those researchers who have made crucial contributions to the target scientific field. The mainstream index, in addition to underlining total influence, also spotlights active researchers who enter into a scientific field in a later development stage. In summary, these two new

Bulovi operatori

AND	Finds documents containing all of the specified words or phrases. Peanut AND butter finds documents with both the word peanut and the word butter.
OR	Finds documents containing at least one of the specified words or phrases. Peanut OR butter finds documents containing either peanut or butter. The found documents could contain both items, but not necessarily.
AND NOT	Excludes documents containing the specified word or phrase. Peanut AND NOT butter finds documents with peanut but not containing butter. NOT must be used with another operator, like AND.
NEAR	Finds documents containing both specified words or phrases within 10 words of each other. Peanut NEAR butter would find documents with peanut butter, but probably not any other kind of butter.
*	The asterisk is a wildcard; any letters can take the place of the asterisk. Bass* would find documents with bass, basset and bassinet. You must type at least three letters before the *. You can also place the * in the middle of a word. This is useful when you're unsure about spelling. Colo*r would find documents that contain color and colour.

Pretraživanje po temi ili ključnim rečima

The screenshot displays the KoBSON website interface. At the top, there are navigation tabs: CPT, SRL, EleČas, EleKnjige, Naši u WOS, Pomoć, and Impresum. On the left side, there is a vertical menu with categories: KoBSON, INFORMACIJE, NAUKA U SRBIJI, and SERVISI. Under SERVISI, there are links for 'Pretraživanje časopisa', 'Elektronski časopisi', and a list of publishers including American Chemical Society, American Physical Society, American Psychological Association, Cambridge University Press, EBSCO, Emerald, Free medical Journals, HeinOnline, HINARI, HighWire Press, IEEE Computer, Institute of Physics, JSTOR, Oxford Journals, ProQuest, SAGE, and ScienceDirect.

The main content area is titled 'EBSCO' and includes the text 'Izdavač: EBSCO Publishing'. Below this, there are two buttons: 'iz akademske institucije' (highlighted with a yellow oval) and 'udaljeni pristup'. The first button has a sub-label '(podržavanje Brzo pretraživanje)'. The second button has a sub-label '(o pristupu "od kuće")'. Below these buttons, there is a section titled 'Brzo pretraživanje' with a paragraph explaining that the fastest access is from an academic institution and that the service will recognize the user as a 'guest user' if accessed from an academic network, meaning full-text access will not be available. It suggests using the 'udaljeni pristup' option in such cases.

Below the text is a search box for 'Research databases' with an 'EBSCO HOST' logo and a 'Search' button. At the bottom of the main content area, there is a section titled 'O servisu' with a paragraph explaining that aggregators are producers of data bases who refer to journals from multiple publishers, making them available for unified searching. Their advantage is that they include journals from smaller publishers, which are only available in this way.

On the right side of the interface, there is a sidebar with several sections: 'NOVI KORISNICI' (with a dropdown arrow), 'Ko ima pravo pristupa', 'Kome je KoBSON dostupan', 'KAKO KORISTITI KoBSON' (with a dropdown arrow), 'Pretraživanje časopisa', 'Pretraživanje Naši u WoS', 'Kako "od kuće" do KoBSON-a', 'KoBSON ZA POČETNIKE' (with a right arrow), 'ČESTA PITANJA O:' (with a dropdown arrow), 'Dostupnosti KoBSON-a', 'Naši u WoS', 'Našim časopisima', 'Citiranosti autora', and 'SKRAĆENICE NA KoBSONu' (with a right arrow).

Highlights

► The mismatch negativity (MMN) indexes different types of central auditory abnormalities in different neuropsychiatric, neurological, and neurodevelopmental disorders. ► The diminished amplitude/prolonged peak latency observed in patients usually indexes decreased auditory discrimination. ► An MMN deficit may also index cognitive and functional decline shared by different disorders irrespective of their specific aetiology and symptomatology. ► MMN deficits index deficient *N*-methyl-*D*-aspartate (NMDA) receptor function affecting memory-trace formation and hence cognition in different disorders.

Izdavači naučnih baza podataka pružaju registrovanom korisniku mogućnost korišćenja *Alert* servisa. Ta opcija Vam omogućava da sačuvate korišćene upite kako biste ih kasnije ponovo izvršavali. Osim toga, možete ih koristiti kao zahtev za periodično slanje izveštaja o novodotatim člancima koji odgovaraju tim upitima.

Da biste koristili ovu pogodnost neophodno je da korisnik otvori svoj lični nalog (regstruje se) na svakom servisu pojedinačno. Te registracije su besplatne i međusobno nezavisne i nemaju nikakve veze sa KoBSON nalogom.

Postoji nekoliko tipova Alerts obaveštenja:

1. *Search Alerts* – obaveštenja vezana za pretrage. Ako korisnik odluči da sačuva određenu formu i sadržinu pretrage (npr. konkretnu konfiguraciju ključnih reči i imena autora po kojima je pretraživao bazu, slika ispod), ima mogućnost da putem Alerts aplikacije konfiguraciju konkretne pretrage sačuva, a da mu servis automatski šalje obaveštenje na e-mail adresu kada god se u bazi pojavi neki novi članak koji odgovara kriterijumima pretrage.
2. *Volume/Issue Alerts* – obaveštenja vezana za nove brojeve i sveske časopisa. Korisnik može da izabere časopise za koje želi da dobija obaveštenja kada god izađe nova sveska časopisa, naravno pod uslovom da se taj časopis referiše u bazi.
3. *Citation Alerts* – obaveštenja vezana za citiranje izabranih članaka. Korisnik može da traži da mu se za određene članke šalju obaveštenja kada god se u bazi pojavi neki novi rad koji citira izabrani članak.

RSS

Šta je RSS?

RSS (Really Simple Syndication) predstavlja aplikaciju za automatsko preuzimanje podataka sa internet sajtova. Uz pomoć RSS aplikacija moguće je pratiti promene na web lokaciji od interesa bez posećivanja samog sajta. RSS automatski preuzima podatke o promenama na sajtu i obaveštava korisnika o njima. Ako se na sajtu pojavi neka nova vest, tekst ili neki drugi sadržaj, korisnik dobija informaciju o tome.

Postoje dva preduslova da bi RSS funkcionisao:

1. Da web sajt ima RSS aplikaciju, tj. da je moguće preuzimati informacije na ovaj način sa njega.
2. Da korisnik ima aplikacije za čitanje RSS-a, kao i da određenu web lokaciju unese u listu sajtova za RSS informacije.

Ove aplikacije se mogu besplatno preuzeti sa Interneta.

Za istraživača koji želi da prati određene naučne časopise u elektronskoj formi (npr. preko KoBSON-a), RSS predstavlja odlično rešenje, jer se sve promene, tj. pojavljivanje novog broja i novih tekstova, automatski detektuju i informacija stiže direktno korisniku, štedeći na taj način njegovo vreme.

Early results of the use of oblong S-ROM cementless acetabular component

Popović Zoran, Pokimica Ljubomir, Starčević Srđan, Rajović Jovo

Massive deficiency of acetabular bone stock is a challenging problem in the increasing number of patients who need a revision of the failed hip arthroplasty. Oblong acetabular cup has been presented as an alternative reconstruction technique for hips with extensive acetabular bone loss. The aim of this study was to present our results with the use of a bilobed acetabular component inserted during revisional surgery, to define indications, and to introduce this method into our orthopaedic practice. Seven patients underwent revisional hip arthroplasty with a cementless oblong acetabular component between September 2000 and June 2002. Six patients underwent revisional hip arthroplasty, and in one primary hip arthroplasty by oblong acetabular component was performed because of bone defect of acetabulum after gunshot fracture. The average follow up was thirteen months. Radiographic analysis in all patients demonstrated stable bone incorporated acetabular component with the restored hip. All the patients walked with full weight bearing and were without pain. On the basis of our experience we find this method satisfactory in certain types of bone defects of acetabulum, and that it provides stable reconstruction of acetabulum with the correction of hip joint.

Keywords: arthroplasty, replacement, hip, acetabulum, treatment outcome

Abstract: New quinazolinone-substituted fluoran Compounds were synthesized by reaction of keto acid, 2'-carboxy-2-hydroxy-4-N-pyrrolidinylbenzophenone with different quinazolinone derivatives in the presence of cone. sulphuric acid. All the synthesized fluoran compounds were characterized by spectroscopic methods (IR, H-1-NMR and UV-visible spectroscopy) and elemental analysis. The fluoran compounds are colourless or nearly colourless and develop colour on contact with electron-accepting compounds.

The main content area is titled 'Nauka u Srbiji' and contains the following text:

Zašto mi ovo radimo?

Jedan od ciljeva KoBSON-a je i da promoviramo naučno publikovanje istraživača koji rade u Srbiji, što činimo tako što:

- nedeljno pratimo sve radove koje su naši istraživači objavili u časopisima koji se referišu u Web of Science-u
- mesečno pratimo citiranost tih radova u Web of Science-u
- nedeljno dodajemo nove sveske časopisa uključenih u DOI sistem
- organizujemo edukacije mladih istraživača za korišćenje elektronskih servisa

On the left side, there is a vertical menu with the following items: 'KoBSON', 'INFORMACIJE', 'NAUKA U SRBIJI', 'Naši u WOS', 'Srpski citatni indeks', 'Kategorizacija časopisa', 'Časopisi u CrossRef-u (DOI)', 'Repozitorijum', 'Elektronski časopisi iz Srbije', 'Referisani časopisi', 'Doktorske disertacije za Mlade istraživače', 'SRBIJA', 'MOŽDA VAM ZATREBA', and 'SUGESTIJE I ZAMERKE'. The 'NAUKA U SRBIJI' and 'MOŽDA VAM ZATREBA' items are circled in yellow. On the right side, there is a sidebar with the following sections: 'NOVI KORISNICI', 'KAKO KORISTITI KoBSON', 'KoBSON ZA POČETNIKE', 'ČESTA PITANJA O:', 'SKRAĆENICE NA KoBSONu', 'DoiSerbia', 'Scindeks', 'Google Scholar', and 'Brza stranica'.

- ❖ Koristiću rezultate pretraga u skladu sa uobičajenom praksom za akademska istraživanja, i poznato mi je da ih mogu čuvati u elektronskoj formi. Rezultate pretraživanja mogu da delim sa drugim studentima i zaposlenima na Univerzitetu na ograničen, razuman način, ali neću objedinjavati svoje rezultate pretraga sa tuđim rezultatima.
