

Title Suppressions

Journals Suppressed from 2021 JCR Data (2022 release)

Journal Impact Factor and 5-Year Impact Factors are not published for the titles listed below due to anomalous citation patterns found in the 2021 citation data. These patterns result in a significant distortion of the Journal Impact Factor and rank that does not accurately reflect the journal's citation performance in the literature. The Journal Impact Factor provides an important and objective measure of a journal's contribution to scholarly communication.

In the interest of fairness and accuracy for all journals, the distortion of the Journal Impact Factor by an excessive concentration of citations gives rise to the need for suppression. Clarivate will monitor these journals going forward and the titles will be included in a future release of JCR, with full metrics listed, when the anomalous patterns are resolved. Coverage of these journals in Web of Science and other Clarivate™ products is not immediately affected by suppression from the JCR. However, the titles may be subject to review to determine if they continue to meet the quality and publication standards necessary for inclusion in Web of Science Core Collection flagship indexes (Science Citation Index Expanded and Social Science Citation Index).

For more information, review our [suppression policy](#). You can review the [title suppression list for previous years](#).

JCR Title	Full Title	Type
CHINESE J ORG CHEM	Chinese Journal of Organic Chemistry	Self
CONNECT SCI	Connection Science	Self
INDIAN J MICROBIOL	Indian Journal of Microbiology	Self
