Elektronski časopisi

Kod većine izdavača KoBSON pretplaćuje časopise u punom tekstu od 1997. godine, dok su ranija godišta dostupna do nivoa abstrakta. Predmetna, ili autorska, pretraživanja po člancima, moguće je obaviti:

- (1) na veb stranici izdavača izabranog iz menija, korišćenjem opcije brzo pretraživanje
- (2) na veb stranici izdavača
- (3) na veb stranicama agregatora (EBSCO, ProQuest)
- (4) indeksne baze (Web of Science, Scopus, Scindeks)

Elektronski časopisi:

Skup pretplaćenih izdavača čiji su naslovi dostupni u formi punog teksta.

- Repozitorijum **55 naslova** domaćih naučnih časopisa sa arhivom punih tekstova od 2002. godine do danas.
- Trenutno broji preko **34.000** članaka opremljenih DOI brojem.

EBSCO serija vebinara

Predstavnici **EBSCO** informacionog servisa zakazali su nekoliko besplatnih vebinara u septembru. Svi vebinari obrađuju veoma zanimljive teme i namenjeni su kako istraživačima, tako i bibliotekarima. Posebno bismo izdvojili i preporučili svim zainteresovanima da se registruju i prisustvuju sledećim vebinarima:

- "Discover advanced functions of My EBSCOhost Folder" koji je zakazan za sredu, 07. septembra 2022. godine u 9.30 časova ([link za registraciju](#))
- "Tips and tricks in advanced search" koji je zakazan za utorak, 20. septembra 2022. godine u 9.30 časova ([link za registraciju](#))

Objavljene korekcije impakt faktora za 2021.

Clarivate Analytics je na svojoj stranici objavio **korekcije impakt faktora za 2021**. Postavljena je lista časopisa koja će se ažurirati dva puta nedeljno. Nakon zaključivanja obrade podataka i publikovanja konačnih lista na stranici izdavača, u Journal Citation Reports-u (JCR), mi ćemo ažurirati podatke u EleČas-u.

Podaci publikovani na ovoj stranici (**odjeljak Data Updates u okviru June 28, 2022**) mogu se smatrati zvaničnim JCR podacima.

(objavljeno 06.07.2022.)

Servisi

U 2016. godini, iz akademskih institucija u Srbiji, dostupno je preko 35.000 naslova stranih naučnih časopisa u punom tekstu, blizu 160.000 naslova knjiga, kao i nekoliko indeksnih baza podataka. Pretraživanje na KoBSON portalu moguće je obaviti samo prema naslovu časopisa ili knjige. Većina časopisa je u punom tekstu dostupna od 1997. godine, dok su ranija godišta dostupna do nivoa abstrakta. Za predmetna pretraživanja po člancima upućujemo Vas ili na nekog od agregatora, ili direktno na sajt izdavača.

Pretraživanje časopisa: Spisak svih časopisa koji su na neki način dostupni u bibliotekama Srbije (bilo elektronski, bilo u papirnoj formi), proširena naslovima časopisa koji su imali Impact Faktor u poslednjih dvadeset godina. Prisustvo časopisa na toj listi je samo pokazatelj njegove dostupnosti, a nikako kvaliteta.

Objedinjena pretraga svih servisa: Pretraga se vrši preko servisa EBSCO Discovery, u okviru forme za pretragu na početnoj stranici KoBSON sajta, kao i odabirom opcije EBSCO Discovery Service na EBSCO platformi.

Elektronski časopisi: Skup pretplaćenih izdavača čiji su naslovi dostupni u formi punog teksta.

Standardi za institucionalno naučno izdavaštvo u otvorenom pristupu

U okviru projekta **DIAMAS** radi se na definisanju standarda, smernica i dobre prakse u institucionalnom naučnom izdavaštvu u otvorenom pristupu, koje će biti objedinjene u dokumentu **Extensible Quality Standard for Institutional Publishing (EQSIP)**. Nedavno je objavljena prva verzija tog dokumenta, koja će tokom narednih meseci biti predstavljena izdavačima, a njihove će sugestije biti uzete u obzir kada se bude radilo na konačnoj verziji dokumenta.

Ako se bavite naučnim izdavaštvom, pozivamo vas da pročitate dokument i da u formularu na dnu **strane** date svoje sugestije. Napišite šta vam se dopada, a šta vam se čini nedostižnim. Šta biste dodali? Koja vrsta pomoći i podrške vam je neophodna da biste ispunili takve zahteve (ako budu usvojeni)?

(objavljeno 06.09.2023.)

Objavljene korekcije impakt faktora za 2022.

Clarivate Analytics je na svojoj stranici objavio i **korekcije impakt faktora za 2022.** Postavljena je lista časopisa koja će se ažurirati dva puta nedeljno. Plant Biotechnology Journal is published by Wiley in association with the Society for Experimental Biology (SEB) and the Association of Applied Biologists (AAB).

Issue Information

Pages: 1511-1512 | First Published: 22 July 2023

Front cover image:

By combining GWAS and transcriptome analyses with gene-editing techniques, we have identified two *S* genes, *RNG1* and *RNG3*. In different rice varieties, there is a correlation between the polymorphisms in the 3'-UTR of these genes and their expression levels, are negatively associated with disease resistance. Editing the 3'-UTR or knocking out either of the two genes in rice can improve resistance against both rice blast and bacterial blight. The left side of the figure shows the normal condition, whereas the right side shows the increased resistance after editing *RNG1* or *RNG3*.

Cover illustration refers to the article published in this issue (Xu et al., pp. 1628–1641).

Keywords: wild rice, QTL, GL12, grain length, grain weight.

To explore the natural variations in the coding region of GL12, four GL12^{oe}-based variants (M1 to M4) were generated (Figure 1e) and independently introduced into the japonica cultivar Zhonghua 11 (ZH11) under the control of the 35S promoter. OE of GL12^{oe}-M1, M2 and M3 had no effect on GL whereas OE of GL12^{oe}-M4 increased GL (Figure 1f,g), indicating that SNPs 1, 2 and 3 are functional variations. We investigated the haplotypes on the three natural polymorphisms in the 19-Gb 3K cultivated rice accessions dataset (Wang *et al.*, 2018), only two haplotypes, C-A-1 of wild rice (Hap-W) and A-G-C of 9311 (Hap-9311) were found. Almost all japonica cultivars contained the three functional SNPs of Hap-W. However, in an *indica* subpopulation, 13 accessions containing Hap-W had, on average, longer grains than the other 1013 accessions containing Hap-9311 (Figure 1h).

To decipher the biological function of the wild rice GL12^{oe} gene, we measured the rate of grain milk filling for the NIL, GL12^{oe}-OE and 9311. Significant differences in 100-grain dry weights were detected among NIL, GL12^{oe}-OE and 9311 at 15 days after fertilization (Figure 1i). Therefore, we investigated the spikeler hulls before fertilization using a scanning electron microscope. There were significantly fewer longitudinal cells in ovulelet hulls from the NIL and GL12^{oe}-OE than in 9311. However

U 2016. godini, iz akademskih institucija u Srbiji, dostupno je preko 35.000 naslova stranih naučnih časopisa u punom tekstu, blizu 160.000 naslova knjiga, kao i nekoliko indeksnih baza podataka. Pretraživanje na KoBSON portalu moguće je obaviti samo prema naslovu časopisa ili knjige. Većina časopisa je u punom tekstu dostupna od 1997. godine, dok su ranija godišta dostupna do nivoa abstrakta. Za predmetna pretraživanja po članicima upućujemo Vas ili na neolog od agregatora, ili direktno na sajt izdavača.

Pretraživanje časopisa: Spisak svih časopisa koji su na neki način dostupni u bibliotekama Srbije (bilo elektronski, bilo u papirnoj formi), proširena naslovnima časopisa koji su imali Impact Faktor u poslednjih dvadeset godina. Prisustvo časopisa na toj listi je samo polozajevi njegovog dostupnosti, a nikako kvaliteta.

Objedinjena pretraga svih servisa: Pretraga se vrši preko servisa EBSCO Discovery, u okviru forme za pretragu na početnoj stranici KoBSON sajta, kao i odabirom opcije EBSCO Discovery Service na EBSCO platformi.

Elektronski časopisi: Skup preplaćenih izdavača čiji su naslovi dostupni u formi punog teksta.

Poput na troškove publikovanja radova u OA časopisima izdavača Brill

Međunarodni konzorcijum EIFL (Electronic Information for Libraries), čiji smo član, je potpisao sporazum sa izdavačkom kućom Brill koji omogućava istraživačima iz Srbije popust u iznosu od 50% na troškove objavljivanja rada (APC) u 314 časopisa ovog izdavača. Sporazum važi do kraja 2022. godine. Sistem automatski prepoznaje autore iz Srbije na osnovu navedene afilijacije i nije potrebno uputiti nikakav dodatni zahtev nakon što je rad prihvaćen za objavu.

Lista časopisa se nalazi na sledećem linku.
Na stranici eIFL-a dostupne su detaljnije informacije u vezi sa publikovanjem rada.

(objavljeno 21.10.2020.)

Poput na troškove publikovanja radova u OA časopisima izdavača World Scientific Publishing

Međunarodni konzorcijum EIFL (Electronic Information for Libraries), čiji smo član, je potpisao sporazum sa izdavačkom kućom World Scientific Publishing koji omogućava istraživačima iz Srbije popust u iznosu od 50% na troškove objavljivanja rada (APC) u 111 časopisa ovog izdavača (110 hybrid OA i jedan Gold OA). Sporazum važi do kraja 2022. godine i važno je da autori, nakon što je njihov rad prihvaćen, napomenu da ispunjavaju uslov za popust. Za sve neodlučice i pomoć mogu se obratiti na sledeću mejl adresu: openaccess@wspc.com.

Lista časopisa se nalazi na sledećem linku.

Open Access Week 2020

"Open with Purpose: Taking Action to Build Structural Equity and Inclusion" tema je 13. po redu međunarodne nedelje otvorenog pristupa koja će trajati od 19.10. do 25.10.2020. godine. Iako donatori, univerziteti, izdavači i naučnici daju veliki doprinos otvorenoj nauci, i ovododnja tema još više naglašava njenu važnost i svrhu. Kako bi otvoreno postalo podrazumevano neophodno je kritički i aktivno angažovanje institucija. Organizator ove manifestacije je SPARC (The Scholarly Publishing and Academic Resources Coalition) - globalna koalicija posvećena otvaranju podrazumevano vrednosti za istraživanje i obrazovanje.

Više informacija nalazi se na zvaničnom sajtu manifestacije www.openaccessweek.org, dok na portalu OpenAIRE možete pronaći listu organizovanih webinarata zakazanih za celu nedelju.

(objavljeno 16.10.2020.)

Servisi po disciplinama

Agregatori i izdavači

Dostupni izdavači:

- AC, AP, CU, EM, IOP, OX, SG, SD, SP, WI, ASME, RSC
- puni tekstovi članaka često dostupni el. pre njihovog štampanja u papirnoj formi

Dostupni agregatori:

- EB, FM, HE, HW, JS, TE
- baze koje sadrže časopise više izdavača, često sadrže “embargo” period 3, 6 ili 12 meseci

Bulovi operatori

| | |
|---------|---|
| AND | Finds documents containing all of the specified words or phrases. Peanut AND butter finds documents with both the word peanut and the word butter. |
| OR | Finds documents containing at least one of the specified words or phrases. Peanut OR butter finds documents containing either peanut or butter. The found documents could contain both items, but not necessarily. |
| AND NOT | Excludes documents containing the specified word or phrase. Peanut AND NOT butter finds documents with peanut but not containing butter. NOT must be used with another operator, like AND. |
| NEAR | Finds documents containing both specified words or phrases within 10 words of each other. Peanut NEAR butter would find documents with peanut butter, but probably not any other kind of butter. |
| * | The asterisk is a wildcard; any letters can take the place of the asterisk. Bass* would find documents with bass, basset and bassinet. You must type at least three letters before the *. You can also place the * in the middle of a word. This is useful when you're unsure about spelling. Colo*r would find documents that contain color and colour. |

eBook Academic Collection (EBSCOhost)

This growing subscription package contains a large selection of multidisciplinary eBook titles representing a broad range of academic subject matter, and is a strong complement for any academic collection. The breadth of information available through this package ensures that users will have access to information relevant to their research needs.

[More Information](#)

Academic Search Premier

This multi-disciplinary database provides full text for more than 4,600 journals, including full text for nearly 3,900 peer-reviewed titles. PDF backfiles to 1975 or further are available for well over one hundred journals, and searchable cited references are provided for more than 1,000 titles.

[Title List](#) [More Information](#)

CAB Abstracts 1990-Present

CAB Abstracts (1990 to Present) covers the significant research and development literature in fields of agriculture, forestry, aspects of human health, human nutrition, animal health, as well as the management and conservation of natural resources. This database offers abstracts and indexing for journals, serial publications, conference proceedings, books, theses, annual reports, patents & standards and dates back to 1990. Coverage is international in scope.

1. Prevalence of *Gardnerella vaginalis* infection and antibiotic resistance pattern of isolates of gynecology clinic patients at Shahrar Noor Hospital from January to June 2020 by PCR and culture methods.

By: Rashidifar, Saghi; Harzandi, Naser; Jahromi, Sahar Honarmand; Gharavi, Mohammad Javad. Iranian Journal of Microbiology and Immunology. 2023; 16(1): 1-11. DOI: 10.22034/ijmi.2023.16.1.1-11

Background and Objectives: *Gardnerella vaginalis* is one of the most important causes of prevalent genital tract infections. The aim of this study was to determine the prevalence and antibiotic resistance pattern of *G. vaginalis* isolates from gynecology clinic patients at Shahrar Noor Hospital from January to June 2020.

Subjects: DRUG resistance in bacteria; MICROBIAL sensitivity tests; BACTERIAL vaginitis; THERAPEUTIC drug resistance

The screenshot shows the EBSCOhost search interface. The search term 'antibiotic resistance' is entered in the search bar. The results list includes two items:

- 121. Antibiotics and Heavy Metal Resistance of The Ecological Areas.** By: Ebrahimpour, G. H.; Moradi, A.; Karikhan, M.; Marzban, A. Search Premier. Background and Objective: most of environmental microorganisms are resistant to some antibiotics... **HTML Full Text** (circled in red)
- 122. Antibiotic resistance: what can we do?** By: Warren, Ed. Practice Nurse. Jan2016, Vol. 46 Issue 1, p18. The article offers the author's insights on the management of antibiotic resistance... **HTML Full Text** (circled in red)

A larger inset shows the full view of the article '122. Antibiotic resistance: what can we do?'. It includes a 'Listen' button (circled in red) and a dropdown menu for 'American Accent' (also circled in red), with other options like 'British Accent' visible.

Title: Antibiotic resistance: what can we do? By: Warren, Ed, Practice Nurse. 09536612, Jan2016, Vol. 46, Issue 1
 Database: Business Source Premier

Antibiotic resistance: what can we do?

When we think of antibiotic resistance, we often think of superbugs causing common infections. But the problem is far more widespread, with high levels of resistance in bacteria causing common infections such as pneumonia, tuberculosis and sexually transmitted infections: but is there anything that we in primary care can do to prevent the arrival of a post-antibiotic era?

As we lurch along in the 21st Century, when the biggest UK killers are cancer and ischaemic heart disease, it is hard to appreciate the role that infectious diseases played before the middle of the 20th Century. Certainly cancer and heart disease existed, but it was infections that frightened people. Industrialisation brought outbreaks of cholera and typhoid to the squalid urban poor. Before that, waves of plague swept the country, and indeed Europe, at regular intervals, with mortality rates that almost defy belief. But perhaps the most telling example of historical killer infections was tuberculosis (TB).

Though accurate records are difficult to acquire, it is believed that TB killed one-third of all those who died in Britain between 1800 and 1850.1 Furthermore it targeted young adults, people who would otherwise be economically active and bringing up children. Like many infectious diseases, the outlook for succumbing to TB improved markedly with improved social conditions and hygiene, but another significant contribution was made by the discovery of drugs that would kill the causative mycobacterium. This was a triumph for science and social progress: in 1913 there were 120,000 cases of TB notified in England and Wales and 39,000 deaths (from a rather smaller national population, and at a time when notification was probably less complete), but by 2013 there were only 7,400 cases notified and 280 deaths.2 However, the 2013 figure is not zero and one important reason for this is the emergence of strains of the TB bacillus which are resistant to multiple antibiotics. If, or more probably when, other seriously nasty infections follow the same pattern (and there is plenty of evidence that this is already happening) we will again face the awful prospect of dealing with waves of incurable infectious diseases. The stakes are really that high.

THE SCALE OF THE PROBLEM
 It has been apparent for some years that resistance to the antibiotics generally used in the treatment of bacteria is becoming more common (it is, of course, the bacteria which acquire resistance, not individual patients). Public Health England estimates that by 2050, antimicrobial resistance (AMR) will cost the global economy \$100 trillion. This also translates into 10 million deaths globally.3 AMR is truly an international concern as infectious diseases are these days concentrated in less economically developed countries, countries that also are going to be less able to pay the costs. The World Health Organization4 is deeply concerned about AMR, stating: "Without urgent, coordinated action, the world is heading towards a post-antibiotic era, in which common infections and minor injuries, which have been treatable for decades, can once again kill." (Pedantic note: antimicrobial resistance refers to resistance to antibiotics, but also to anti-fungal and anti-viral drugs. As antibiotics are used much more in primary care than the other two categories, this article focuses on antibiotics).

The screenshot shows the ScienceDirect search interface. The search results are for 'human stem cells' with 2,405 results. The left sidebar contains filters for Year, Publication title, Topic, and Content type. A yellow callout box with red text is overlaid on the search results, pointing to the word 'human' in the article titles. The callout text reads: 'Primer članka u Online First režimu'. The search results list several articles, including 'Efficient Derivation of Functional Human Airway Epithelium from Pluripotent Stem Cells via Temporal Regulation of Wnt Signaling', 'Making human cardiomyocytes up to date: Derivation, maturation and transplantation', 'Histone Demethylase Expression Enhances Human Somatic Cell Nuclear Transfer Efficiency and Promotes Derivation of Pluripotent Stem Cells', and 'Differentiation and sarcomere formation in skeletal myocytes directly prepared from human induced pluripotent stem cells using a sphere-based culture'. The ScienceDirect logo is in the top left, and navigation links for Journals, Books, Register, and Sign in are in the top right. A KoBSON logo is also present in the top right corner.

Pretraživanje po temi ili ključnim rečima

The screenshot shows the ScienceDirect article page for 'iScience'. The article title is 'SISTEMA: A large and standardized collection of transcriptome data sets for human pluripotent stem cell research'. The page includes a sidebar with navigation options like 'Outline', 'Highlights', 'Summary', 'Graphical abstract', 'Keywords', 'Introduction', 'Results', 'Discussion', 'STAR&Methods', 'Acknowledgments', 'Supplemental information', and 'References'. The main content area features the article title, authors (Margot Jarrige, H  l  ne Polv  che, Alexandre Carteron, St  phane Janczarski, Marc Peschanski, Didier Auboeuf, C  cile Martinat), and a 'Highlights' section. The 'Highlights' section contains three bullet points: 'SISTEMA is a curated gene expression database using human pluripotent stem cell lines', 'A single experimental and analytical pipeline are used for the transcriptomic analyses', and 'SISTEMA is a user friendly Web portal designed for the stem cell community'. The 'Summary' section is partially visible at the bottom. The right sidebar contains 'Recommended articles', 'Citing articles (0)', and 'Article Metrics' (Readers: 5, Tweets: 2). The top navigation bar includes 'Journals & Books', 'Search ScienceDirect', 'Register', and 'Sign in'. The 'View PDF' button is circled in red, and the 'Summary' section is also circled in red. Orange arrows point from the left margin to the 'View PDF' button, the 'Figures (7)' section, the 'Tables (1)' section, the 'Extras (2)' section, the 'Recommended articles' section, and the 'Summary' section.

O TEEAL (The Essential Electronic Agricultural Library) bazi

TEEAL je elektronska baza podataka koja sadrži preko 560 naslova časopisa od preko 90 izdavača iz oblasti agrikulture. Pretražive su agrikulturna ekonomija, poljoprivredna tehnika, agronomija, usevi i nauka o zemljištu, entomologija, upravljanje prirodnim resursima, šumarstvo, upravljanje poljoprivredom, ishrana i nauka o hrani, biljna patologija, ruralni razvoj, održiva poljoprivreda, veterina i slične nauke i discipline.

Kratko uputstvo o pretraživanju baze

Bazu je moguće pretraživati po temi ili ključnim rečima, pri čemu se pretraga termina vrši u naslovu, autorima i sažetku. Ako želite konkretnu pretragu po naslovu, autoru ili sažetku izaberite odgovarajuću stavku iz padajuće liste.

Takođe je omogućeno i napredno pretraživanje – pretraživanje po više različitih kriterijuma istovremeno - po zadatoj temi ili autoru, sa ograničavanjem na pojedinu godinu i/ili na pretraživanje samo u okviru jednog naslova časopisa. Izborom pojedinačnog naslova časopisa dobija se lista svih radova objavljenih od 1993. godine, – izlistanih obrnuto-hronološki – od najnovijih ka starijim godištim, ali se pretraživanje može ograničiti i na samo jednu godinu.

| Naslov | Environmental life cycle assessment of cereal and bread production in Norway |
| Autor(i) | Korsaeth-A, Jacobsen-A-Z, Roer-A-G, Henriksen-T-M, Sonesson-U, Bonesmo-H, Skjeltvåg-A-O, Strømman-A-H |
| Abstract | We assessed the environmental impacts of producing bread, as delivered to the consumer, assuming the use of Norwegian ingredients only. Ten impact categories, including global warming potential (GWP), were quantified by mixed modelling and life cycle assessment. Firstly, we quantified the impacts of growing barley, oats, winter and spring wheat on 93 farms that were representative of the main cereal production regions in Norway. We used wide system boundaries, which included all relevant processes occurring both pre-farm and on-farm. Secondly, we assessed a representative production chain for bread, including transport, milling, baking and packing processes. On-farm processes accounted for a large share of the environmental impacts attributable to the production of bread (e.g. 50% for GWP). There is thus considerable potential for environmental improvements through changes in farm management. In total, the GWP per kg of bread (freshweight) was 0.95 kg CO ₂ -equivalent. The environmental footprint of transport was small. |

Indeksne baze

Indeksne baze podataka sadrže bibliografske podatke o radovima iz časopisa koji su u njima zastupljeni. Za svaki članak dati su detaljni podaci:

- autor rada i institucija
- naslov rada
- naziv časopisa
- godina
- jezik rada
- tip rada
- sažetak

Ukoliko zapis obuhvata i popis korišćene literature, takve baze nazivamo citatnim (Web of Science, Scopus, Srpski citatni indeks).

O bazi

MEDLINE je vodeća svetska bibliografska baza iz oblasti biomedicinskih nauka. Dostupna je besplatno.

Pored bibliografskih podataka o svakom članku iz preko 5.000 časopisa, uspostavljen je i link do punog teksta. Dostupnost članka u punom tekstu uslovljena je pretplatom na elektronsku verziju časopisa (preko KoBSON-a ili na neki drugi način).

Svaki članak se indeksira odrednicama iz kontrolisanog terminološkog tezaurusa Medical Subject Headings - MeSH (<http://www.nlm.nih.gov/mesh/meshhome.html>), koji obuhvata preko 24.500 odrednica uređenih hijerarhijski na devet nivoa.

Pretraživanje apstraktne baze Medline

The screenshot shows the PubMed.gov homepage. At the top left is the NIH logo and the text "National Library of Medicine National Center for Biotechnology Information". At the top right is a "Log in" button. The main heading is "PubMed.gov". Below it is a search bar with the placeholder text "Search PubMed" and a green "Search" button. Under the search bar is a link for "Advanced" search. A paragraph of text states: "PubMed® comprises more than 30 million citations for biomedical literature from MEDLINE, life science journals, and online books. Citations may include links to full-text content from PubMed Central and publisher web sites."

Alert

Korišćenje Alert opcije

Izdavači naučnih baza podataka pružaju registrovanom korisniku mogućnost korišćenja *Alert* servisa. Ta opcija Vam omogućava da sačuvate korišćene upite kako biste ih kasnije ponovo izvršavali. Osim toga, možete ih koristiti kao zahtev za periodično slanje izveštaja o novodotatim člancima koji odgovaraju tim upitima.

Da biste koristili ovu pogodnost neophodno je da korisnik otvori svoj lični nalog (registruje se) na svakom servisu pojedinačno. Te registracije su besplatne i međusobno nezavisne i nemaju nikakve veze sa KoBSON nalogom.

Postoji nekoliko tipova Alerts obaveštenja:

1. *Search Alerts* – obaveštenja vezana za pretrage. Ako korisnik odluči da sačuva određenu formu i sadržinu pretrage (npr. konkretnu konfiguraciju ključnih reči i imena autora po kojima je pretraživao bazu, slika ispod), ima mogućnost da putem Alerts aplikacije konfiguraciju konkretne pretrage sačuva, a da mu servis automatski šalje obaveštenje na e-mail adresu kada god se u bazi pojavi neki novi članak koji odgovara kriterijumima pretrage.
2. *Volume/Issue Alerts* – obaveštenja vezana za nove brojeve i sveske časopisa. Korisnik može da izabere časopise za koje želi da dobija obaveštenja kada god izađe nova sveska časopisa, naravno pod uslovom da se taj časopis referiše u bazi.
3. *Citation Alerts* – obaveštenja vezana za citiranje izabranih članaka. Korisnik može da traži da mu se za određene članke šalju obaveštenja kada god se u bazi pojavi neki novi rad koji citira izabrani članak.

RSS

Šta je RSS?

RSS (Really Simple Syndication) predstavlja aplikaciju za automatsko preuzimanje podataka sa internet sajtova. Uz pomoć RSS aplikacija moguće je pratiti promene na web lokaciji od interesa bez posećivanja samog sajta. RSS automatski preuzima podatke o promenama na sajtu i obaveštava korisnika o njima. Ako se na sajtu pojavi neka nova vest, tekst ili neki drugi sadržaj, korisnik dobija informaciju o tome.

Postoje dva preduslova da bi RSS funkcionisao:

1. Da web sajt ima RSS aplikaciju, tj. da je moguće preuzimati informacije na ovaj način sa njega.
2. Da korisnik ima aplikacije za čitanje RSS-a, kao i da određenu web lokaciju unese u listu sajtova za RSS informacije.

Ove aplikacije se mogu besplatno preuzeti sa Interneta.

Za istraživača koji želi da prati određene naučne časopise u elektronskoj formi (npr. preko KoBSON-a), RSS predstavlja odlično rešenje, jer se sve promene, tj. pojavljivanje novog broja i novih tekstova, automatski detektuju i informacija stiže direktno korisniku, štedeći na taj način njegovo vreme.
