

JCR Data Update (July 28, 2018)

At the time the *Journal Citation Reports* data were extracted, the journal **Taiwania** was listed as a publication asset of the Peoples Republic of China. This is how the data are displayed in the product at release date. When the data are refreshed later this year, the correct attribution of Taiwan as the publishing region will be implemented.

After the initial annual JCR release is published, this section will be updated weekly with notes about pending additions or adjustments to the JCR data. All changes will be reflected in the JCR application when the dataset is reloaded and closed later in the year. Citation metrics published in this section can be considered official JCR data.

This is unlikely to change, but should be considered provisional until the data are reloaded later in the year.
