# Achievement

Ongoing and renewed support to Diamond OA publishing:

Engaging publishers, editors and librarians around European project seeking to support Diamond OA publishing (DIAMAS, CRAFT-OA, PALOMERA)

# How it was done

- By promoting updated journal policy templates developed by EIFL
- By encouraging local journals to apply for indexing in DOAJ
- By supporting/facilitating events (4 DIAMAS SURVEY-A-THONS; OA Week 2023: a presentation of DIAMAS survey results and a discussion with editors)
- By engaging with the projects (KoBSON took part in a focus group on financial sustainability of Diamond OA publishing – DIAMAS)
- By encouraging local OA publishers to engage with the projects (e.g. invitations to respond DIAMAS landscape survey; CRAFT-OA survey)
- By promoting project events and taking part in them

# Advice or challenge

Institutional OA publishers need continued support. There is always something new to learn.

DOI provision and plagiarism detection tools are still major challenges and we don't have an efficient solution.
